DETAILED ACTION

Response to Remarks

1. The Office Action has been issued in response to amendment filed July 17, 2007.

Claims 1-2 and 6-8 are pending.

Allowance

The following is an examiner's statement of reasons for allowance: The following is an examiner's statement of reasons for allowance: The most pertinent prior art is Hosinger et al (Patent No.: 6,678,390) and Muratani et al (Patent No.: 6,983,059). Hosinger discloses a method for creating a message template used for embedding hidden messages. Hosinger teaches the method comprising the steps of: (a) determining a message template performance metric, (b) determining a message template geometric configuration comprising: (i) determining a message template capacity, (ii) determining a message template area and (c) developing a numerical optimization algorithm containing the message template performance metric as a basis for optimization comprising: applying simulated annealing to the current configuration. However, Hosinger does not teach where developing a numerical optimization algorithm containing the message template performance metric as a basis for optimization comprises initializing a current configuration that is randomly. Muratani discloses a digital watermark detecting method that includes randomly selecting a

sequence seed. However, Muratani does not teach developing a numerical optimization algorithm containing the message template performance metric as a basis for optimization comprises initializing a current configuration that is randomly. The examiner finds no reason or motivation to combine the above references in an obvious rejection thus placing the application in condition for allowance.

2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
